DETAILED ACTION

Claim Rejections - 35 USC § 103

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 1, 4-6, 8-11, 14-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over De Veau et al. (5994679).

De Veau et al. teaches a housing having peripheral sides with inner and outer side walls, said optical fiber array being fixed in said housing, and said housing having first and second slots formed on respective peripheral sides so as to face each other (e.g., fig. 3 item #s 23, 24), each of the first and second slots having open ends so that the inner and outer side walls of the housing are in communication with each other; and first and second boots inserted in the first and second slots, respectively (fig. 3; col. 4 lines 25-35).

Although De Veau et al. (e.g., at fig. 3) teaches a fiber array (and, therefore, an optical fiber) inserted through channeled aperture member/boot 24, De Veau et al. teaches a fiber, while not explicitly stating a "fiber array", inserted through channeled aperture member/boot 23. It would have been obvious to one

of ordinary skill in the art at the time the invention was made to configure channeled aperture member/boot 23 of fig. 3 to receive a fiber array rather than just a single fiber for the purpose of providing multiple inputs to the optical integrated circuit, which is a notoriously well known (NWK) practice for such optical integrated circuit devices. Thus, it would have been obvious to one of ordinary skill in the art at the time the invention was made for an optical fiber of the optical fiber array to be inserted through the first and second channeled aperture members/boots (23, 24), to fix the optical fiber lengthwise.

Thus claim 1 is rejected.

De Veau et al. teaches the packaging unit according to claim 1, wherein the first boot is sized to receive no more than a single optical fiber (See no. 23 of fig. 3). Thus claim 4 is rejected.

De Veau et al. teaches the packaging unit according to claim 1, wherein the optical fiber array include a Planar Lightwave Circuitry (PLC) chip, and an input fiber block at an input side of the PLC chip, and an output fiber block at an output side of the PLC chip. (fig.3). Thus claim 5 is rejected.

De Veau et al. teaches the packaging unit according to claim 1, wherein the optical fiber array is fixed in the housing with an adhesive (col. 5 lines 19-50). Thus claim 6 is rejected.

De Veau et al. teaches the packaging unit according to claim 1, wherein the first and second slots are sized to retain the first and second boots (fig. 3; col. 4 lines 25-35). Thus claim 8 is rejected.

De Veau et al. teaches the packaging unit according to claim 1, wherein the first and second boots have respective engaging portions, each respective engaging portion being arranged substantially perpendicular to a lengthwise direction of the respective first and second boots (fig. 3; col. 4 lines 25-35).

Thus claim 9 is rejected.

De Veau et al. teaches the packaging unit according to claim 1, wherein the respective first and second slots each have a portion substantially perpendicular to a lengthwise direction of the first and second boots to receive the respective engaging portion of the respective first and second boots (fig. 3; col. 4 lines 25-35). Thus claim 10 is rejected.

By the reasons and references given above each and every element of claims 11, 14-19 are also rejected.

Allowable Subject Matter

Claims 2-3, 7, 12-13, 20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
